INDUSTRIES

QUALITY IS WHAT OUR COMPANY BELIEVES IN

LEADING MANUFACTURER OF **HEAT SHIELD GASKETS COPPER ITEMS**

IN HOUSE FACILITY

- **IN HOUSE TOOLING SECTION**
- **RM IN STOCK MORE THAN 1 MONTH**
- **MANUFACTURING TOOLS**
- **PLATTING**

About Us :

Established in the year 1989 in Maharashtra, our company, Omkar Industries, is the leading manufacturer and supplier of products such as pallet collar hinges, gaskets and heat shields. Under our quality-approved collection of products, we are presenting Cable Dispenser, Pallet Hinges and Cable Drum Lifting Jack. Offered products are manufactured from high-grade input factors.

Our offered products are highly admired by customers for their ease of use, low maintenance, high performance, lightweight, and longer service life. Apart from this, one can avail of these products within a limited period at reasonable prices.

35+
Years of
Experience

Our Vision & Mission:

Vision

To be the global leader in sheet metal solutions, pioneering innovative designs, and setting benchmarks in quality, safety, and sustainability, while continuously adapting to the evolving needs of our Customers and the environment.

Mission

We are committed to delivering precision-engineered sheet metal products and services that cater to diverse industries. Through continuous investment in technology, training, and sustainable practices, we aim to meet the highest standards of quality, reliability, and environmental responsibility. We value our relationships with customers, suppliers, and employees, striving always to exceed expectations and drive industry advancements.

Our Strength & Quality Assurance

Strength

Rapid Development and Flexible Manufacturing Unit Along with all House Machineries & Facilities to Make Precision Work.

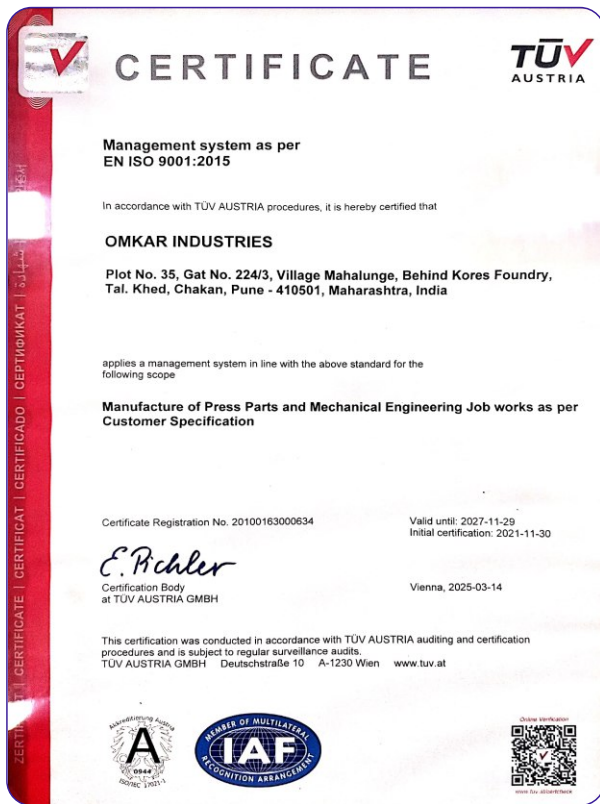

Quality Assurance

We are a highly acknowledged name that is involved in providing an extensive range of cable-laying equipment to our esteemed customers. Made in compliance with industry rules, the entire array of products is highly appreciated by our valued customers.

Our Products:

Heat Shield In Ss304

Crafted entirely from premium SS304 stainless steel, this heat shield provides excellent corrosion resistance and structural strength at high temperatures. The polished finish reduces heat buildup while offering clean durability. Lightweight yet sturdy, it is precision-pressed and edge-finished for seamless fitment on cable drums, exhaust systems, or industrial machinery. With low maintenance and a long service life, it ensures reliable thermal protection and performance integrity. Offered at competitive prices, delivery is fast and dependable.

Key Features:

- **Superior corrosion resistance**
- **Lightweight strength**
- **Customizable and easy to install**
- **Versatile applications**

CRCA Heat Shield

CRCA heat shields are made from cold-rolled steel that's close-annealed in a nitrogen-sealed furnace to relieve stress and enhance ductility. They offer excellent dimensional accuracy (thickness 0.30–3.0 mm), superior surface finish (matt, bright, mirror), and tight tolerances ($\approx \pm 0.02$ mm). These steel shields are high-strength (tensile ~ 270 – 410 MPa), formable, dent-resistant, weldable, and paintable—ideal for automotive panels, heat protection, appliances, and engineering applications.

Key Features:

- **Excellent surface finish**
- **Enhanced ductility**
- **Good corrosion resistance base**
- **High strength-to-weight ratio**

Copper Products

We offer high-grade copper products including IS 6160 compliant bare round/rectangular wires, paper-covered and fiberglass-insulated wires for transformers, enamel-insulated magnet wires (round/flat with various thermal coatings up to Class C), and enamel-fiberglass insulated wires (ENFGC) for high-thermal, corrosion-resistant applications in transformers, motors, UPS, and power distribution.

Key Features:

- **High conductivity & purity**
- **Conforms to standards**
- **High thermal stability**

Shock Absorber Buying Product

When selecting a shock absorber, prioritize vehicle fit. Choose between twin-tube (comfort, affordability) and monotube/gas-charged (performance, heat dissipation) based on driving style (commuting vs. off-road/towing). Consider features like adjustable damping or remote reservoirs for heavy use, opt for quality materials (steel/aluminum, corrosion-resistant finishes), verify warranty, and inspect for stability and leaks to ensure consistent tire contact, damping efficiency, and ride comfort.

Key Features:

- **Type & Construction**
- **Build Quality**
- **Damping Medium**
- **Compatibility**
- **Adjustability**

Welmode Locking System

Welmade Locking Systems' flagship "Jemmy Proof Door Lock" boasts a robust Mazak-alloy body, dual interlocking dead bolts ($\varnothing 9.5 \times 17.5$ mm), 14-pin unpickable dimple key (over 1 million combinations), antique brass finish, knob operation inside and key outside, free fitting service, ideal for 30–70 mm doors—engineered for superior anti-theft performance in sliding, folding, balcony, wardrobe, and steel/wood doors.

Key Features:

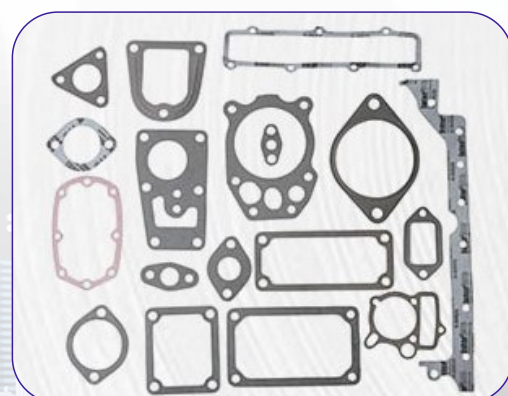

- **Two vertical interlocking dead bolts ($\varnothing 9.5 \times 17$ mm) for enhanced anti-jemmy protection.**
- **Operates via knob inside, key outside—deadlock capable.**
- **Suitable for doors 30–70 mm thick, including sliding, folding, balcony, wardrobe, steel or wood applications.**

Solicore And Tin Products

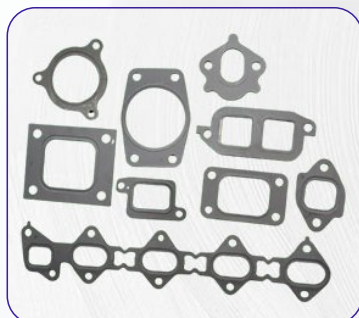

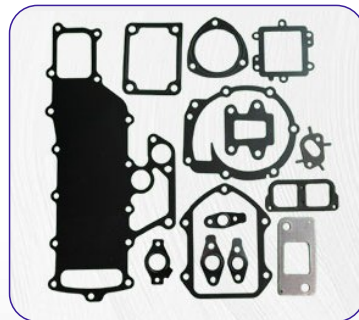

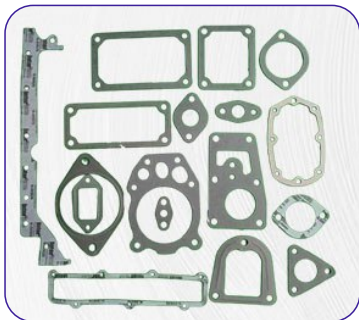

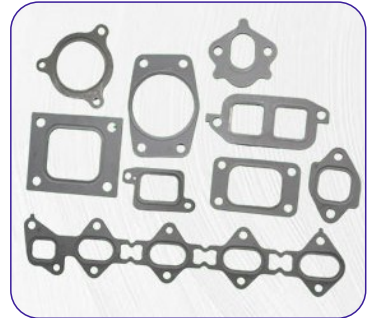

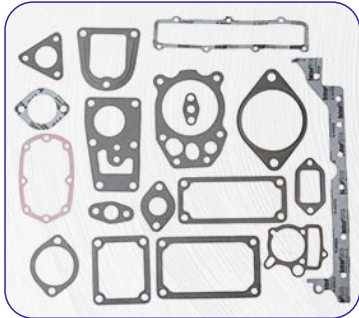

Our products, made from high-grade domestic tinplate, include aerosol, solvent-cement, ghee, oil, decorative, and brush-in cans, plus various other containers. All feature precision-welded seams, leak-proof design, corrosion resistance, excellent printability, UV/bacterial protection, long shelf life, lightweight structure, customizable options, and 100% recyclability. These are ideal for paints, chemicals, food, cosmetics, industrial sprays, and household goods, with rapid production and prompt delivery from our Pune, Maharashtra facility.

Key Features:

- **High strength & pressure resistance**
- **Superior sealing & tamper-evidence**
- **Eco-friendly & recyclable**
- **Customizable formability**
